

环游世界之旅 (6/8-6/12):

Age 5-7

Creative Art Class: Tasty Hand-Pulled Noodles:

手做拉面

In this fun, hands-on art class, children transform everyday food into creative expression. Inspired by traditional hand-pulled noodles, students use colorful clay to stretch, shape, and design their own imaginative “noodle dishes.” Blending cultural learning with art-making, this class encourages creativity, sensory exploration, and storytelling through materials.

From culture to creativity

Children explore the story and making process of hand-pulled noodles, discovering different shapes, colors, and playful “ingredient” combinations.

Hands-on making & skill building

Using colored clay, kids roll, stretch, and shape their own “noodles” and dishes. The process **enhances hands-on skills**, strengthens fine motor control, and builds confidence in creating.

Imagination comes to life

Each child designs their own unique “meal,” experiencing how different materials bring out unexpected beauty and creativity.

Age 8-10

Creative Art Class: Air-Dry Clay Cake Design 🍰 粘土蛋糕设计

Class Description

In this imaginative, hands-on art class, children become “cake artists” using air-dry clay instead of real frosting. Inspired by colorful bakery cakes, students learn how to build, decorate, and design their own unique clay cakes on mini bases. From piping textures to layering decorations, this class blends sculpture, color design, and playful creativity—no baking required!

Class Goals

✨ **Hands-on skill development**

Children roll, pinch, stack, and decorate clay to **enhance hands-on abilities** and strengthen fine motor skills.

✨ **Creativity & design thinking**

Students explore color combinations, shapes, and composition while designing their own one-of-a-kind “cakes.”

✨ **Material exploration**

Learn techniques for working with air-dry clay, including texture-making, layering, and 3D construction.

✨ **Focus & patience**

Step-by-step building encourages concentration, problem-solving, and attention to detail.

野外生存与探险 (6/15-6/19):

Age 5-7

Creative Art Class: Camping Adventure – What's Inside My Suitcase? 🦋 神奇的行李箱

Class Description

In this fun and interactive art class, children design and create their own “travel suitcase” filled with items for a camping adventure. Using drawing, coloring, cutting, and collage techniques, students imagine what they would bring on a trip and arrange their belongings inside a playful suitcase layout. This project combines storytelling, design, and hands-on making—turning imagination into a personal visual story.

Hands-on skill development

Cutting, placing, and assembling elements helps enhance hands-on abilities and strengthen fine motor skills.

Creativity & storytelling

Children decide what to pack for their camping trip, expressing personality, preferences, and imagination through their choices.

Organization & design thinking

Students learn how to arrange objects thoughtfully within a space, exploring composition, balance, and visual storytelling.

Observation & daily connection

By thinking about real-life items (clothes, toys, tools), kids connect art with everyday experiences.

野外生存与探险 (6/15-6/19):

Age 8-10

Camping Adventure – Torch Light Forest Art 🏕️🌲 手电筒夜晚探险

Class Description

In this creative art class, children design a nighttime camping scene using a “torch light” effect. They create a dark forest background and add a flashlight beam revealing hidden elements like animals or tents. Through drawing, coloring, cutting, and collage, students turn light into a fun storytelling experience.

Hands-on skill development

Build fine motor skills through cutting, gluing, and assembling.

Creativity & storytelling

Use imagination to create a unique camping scene inside the light.

Organization & design thinking

Explore contrast and composition by arranging elements within the light and dark areas.

Observation & daily connection

Understand how light works at night and connect to real camping experiences.

我的职业梦想(6/22-6/26):

Age 5-7 半身

My Dream Job – Creative Art Exploration 🧑🔬👨🍳👮 我的职业梦想自画像

Class Description

In this fun and imaginative art class, children explore their dream jobs by creating a character in their future role. Using drawing, coloring, and collage, students design themselves as scientists, chefs, police officers, or any career they dream of, along with tools and environments related to their job.

Learning Objectives

Hands-on skill development

Build fine motor skills through drawing, coloring, cutting, and assembling details.

Creativity & storytelling

Express personal dreams and interests by designing a unique character and scene.

Organization & design thinking

Arrange elements like tools, background, and character to create a clear composition.

Observation & daily connection

Recognize different professions and connect them to real-life roles and responsibilities.

我的职业梦想(6/22-6/26):

Age 8-10 全身

This is a “Dream Career” creative art project for ages 8–10, using a comic-style / panel composition:

Each artwork represents one career theme (teacher, magician, scientist, artist, musician, explorer, etc.)

🎯 Learning Objectives

1. Knowledge

Understand different professions

Think about “What do I want to be in the future?”

2. Skills

Character design (simplified proportions, expressions)

Composition using panels/sections

Visual storytelling through symbols (e.g., microscope = scientist)

3. Emotional / Personal Growth

Self-expression

Building identity and confidence

小小艺术家(7/6-7/10):

My Mini Art Museum – 4-Sided Rotating Gallery 🎨 立体旋转美术馆

For both age groups

Class Description

In this creative art class, children design a 3D rotating mini museum with four sides. Each side features a different artwork or style, such as famous artists, self-portraits, or imaginative designs. Using drawing, coloring, and simple construction, students build their own interactive art gallery.

Learning Objectives

Hands-on skill development

Build fine motor skills through folding, assembling, and constructing a 3D structure.

Creativity & storytelling

Explore different art styles and express ideas across four unique panels.

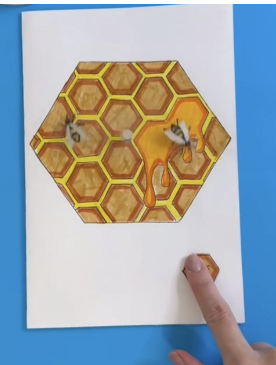

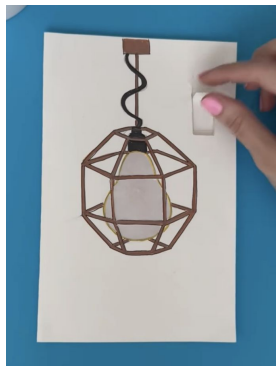

Organization & design thinking

Plan and arrange artworks on each side, understanding sequence and layout.

Observation & daily connection

Learn about artists and connect their styles to personal creations.

玩转新科技(7/13-7/17):

Creative Circuit Art – Light & Motion ⚡🎨当电路遇上艺术

For both age groups

Class Description

In this fun and hands-on art class, children explore simple circuits through creative projects. Students design interactive artworks—such as a glowing lamp, moving bee, or spinning object—by combining drawing, coloring, and basic electrical components. This class blends art and science, turning creativity into working designs.

Learning Objectives

Hands-on skill development

Develop fine motor skills through assembling components, attaching wires, and creating artwork.

Creativity & storytelling

Design imaginative scenes where light or movement enhances the story.

Organization & design thinking

Understand how to place components and plan layouts for both function and design.

Observation & daily connection

Learn basic circuit concepts and connect them to everyday objects like lights and machines.

Zero Waste和可持续发展(7/20-7/24):

Creative Recycling – Trash to Treasure 🔄♻️垃圾大改造

Age 5-7

Class Description

Recycled Paper Art: From Waste to Creation

In this hands-on class, students will explore how to transform used paper into beautiful handmade recycled paper. Through tearing, soaking, blending, and shaping, students will learn the process of papermaking while experimenting with natural materials such as dried flowers, leaves, tea, and threads.

This project combines art, sustainability, and sensory exploration, encouraging students to think creatively about reuse and environmental responsibility. Each student will design their own unique textured paper that can be turned into an artwork, card, or display piece.

🎯 Learning Objectives

By the end of the class, students will be able to:

🌱 Knowledge & Understanding

Understand the concept of recycling and sustainability

Recognize how materials can be transformed and reused

Identify different natural materials used in art-making

Zero Waste和可持续发展(7/20-7/24):

Creative Recycling – Trash to Treasure ♻️🗑️垃圾大改造

Age 8-10

Class Description

In this fun and eco-friendly art class, children transform everyday waste materials into creative artworks. Using items like bottles, cardboard, and packaging, students design colorful sculptures such as flowers, animals, or imaginative characters. This project encourages creativity while learning the value of recycling.

Learning Objectives

Hands-on skill development

Build fine motor skills through cutting, assembling, and constructing with mixed materials.

Creativity & storytelling

Turn recycled objects into unique designs and imaginative creations.

Organization & design thinking

Explore how to combine different shapes and materials into balanced structures.

Observation & daily connection

Understand recycling concepts and connect art with environmental awareness.

小小生活家(7/27-7/31):

3D Mini Room: Little Life Designer (Ages 5–7)

In this fun and imaginative class, young students will create their own 3D pop-up room using paper folding, drawing, and coloring techniques. Inspired by their daily life, students will design a cozy bedroom or living space, complete with furniture, decorations, and personal details.

Through this project, children will explore basic spatial awareness, storytelling, and creativity while transforming a flat piece of paper into a simple three-dimensional structure. This hands-on activity encourages students to express their personality and imagine their ideal living space.

Learning Objectives

By the end of the class, students will be able to:

Knowledge & Understanding

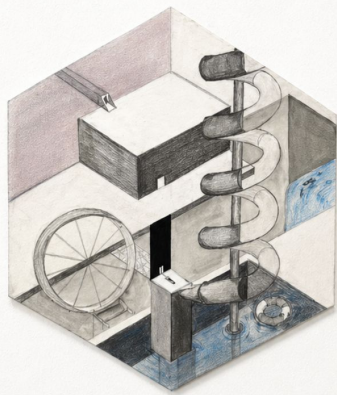

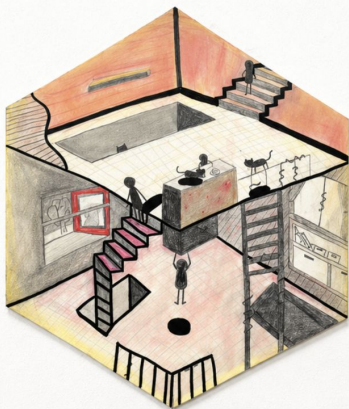

Understand the concept of 2D to 3D transformation

Recognize basic parts of a room (bed, window, furniture, etc.)

Develop awareness of space and layout

小小生活家(7/27-7/31):

Class Description

Isometric Space Design: Creative Room in a Box (Ages 8–10)

In this engaging art project, students will explore the concept of isometric drawing by designing their own imaginative “room in a box.” Inspired by real-life spaces and creative storytelling, students will construct a three-dimensional cube-like environment on paper, showing different sides of a room from a unique angled perspective.

Through sketching, shading, and coloring, students will learn how to represent depth, structure, and space while adding personal details such as furniture, objects, and narrative elements. This project blends architecture, design, and storytelling, encouraging students to think creatively and spatially.

By the end of the class, each student will create a visually dynamic artwork that looks like a miniature world captured inside a geometric form.

Knowledge & Understanding

Understand the concept of isometric perspective and how it shows 3D space on a 2D surface

Recognize how different sides of a space (walls, floor, ceiling) connect to form a structure

Identify basic elements of interior spaces (stairs, furniture, objects)

我要开学啦(8/3-8/7):

My 3D Backpack – Creative Design 🎒✨ (5-10)

Class Description

In this fun and creative art class, children design their own 3D backpack using drawing, coloring, and layered paper elements. Students decorate their backpacks with personal items, cute objects, and imaginative details, turning a simple design into a playful, pop-up artwork.

Learning Objectives

Hands-on skill development

Build fine motor skills through cutting, layering, and assembling 3D elements.

Creativity & storytelling

Express personality by choosing and designing items to place on the backpack.

Organization & design thinking

Explore composition by arranging decorations and balancing shapes on the surface.

Observation & daily connection

Connect the artwork to everyday life by designing a familiar object in a creative way.
